Professional Summary

Results-driven software developer with expertise in JavaScript, specializing in React, Node.js, and Express. Proficient in building scalable web applications and designing user-friendly interfaces. Experienced in both frontend and backend development, with a strong focus on problem-solving. Proven ability to deliver high-quality projects and collaborate effectively with clients and teams.

Projects

Personal Projects | Full Stack Developer

Invoice Portal | MERN Stack

- Developed a web application for facilitating project reviews and managing time allocations for various projects.
- Implemented user authentication and authorization using JWT to ensure secure access to different project roles.

Rolex Landing Page | React.js, Tailwind CSS

- Built a responsive and visually appealing landing page for Rolex, showcasing products and brand highlights.
- Utilized React.js to manage dynamic content and Tailwind CSS for efficient styling and layout design.

Progress Pulse (MERN Stack, JWT Auth)

- Created a web app allowing users to log in and track their daily progress, with a focus on user experience and data security.
- Implemented a secure authentication system using JWT, ensuring that user data remains protected.
- Designed and built both the front-end and back-end, handling everything from UI design to database management.
